

Software Update: FileMaker Pro Advanced 18.0.2

This software updates FileMaker Pro 18 Advanced to version 18.0.2 and fixes bugs.

If you are unable to successfully update to FileMaker Pro 18.0.2 Advanced, search the FileMaker Knowledge Base for installation information.

Software details

The following issues were addressed.

Important: To ensure that you don't encounter the issues below, you must update all clients to FileMaker Pro 18.0.2 Advanced.

Script steps and functions

- Under certain conditions, the Import Records script step displays the Open File dialog box when an XML data source is specified.
- Under certain conditions, the application closed unexpectedly when XML Data was specified as the data source for the Import Records script step.
- Windows 10: An issue occurred when editing script steps that display long lists of tables.
- FileMaker Pro Advanced 18.0.2 uses OpenSSL 1.1.1. As a result, support for the SHA (also known as SHA-0) cryptographic hash algorithm has been removed. Setting the algorithm parameter in the CryptAuthCode, CryptDigest, CryptGenerateSignature, or CryptVerifySignature function to SHA now causes the function to return "?".

Application

- Windows: The FileMaker Pro Advanced installer could not find the license certificate when the certificate's path contained non-ASCII characters.

Printing

- Windows: Page numbers may appear differently between Preview mode and the printed output.

Who should download?

Platform	Product	Updates Version	Download 32-bit	Download 64-bit
Windows	FileMaker Pro 17 Advanced	18.0.1	FileMaker Pro 18.0.2 Advanced Updater (setup.exe) Windows	FileMaker Pro 18.0.2 Advanced Updater (setup.exe) Windows
OS X	FileMaker Pro 17 Advanced	18.0.1	FileMaker Pro Advanced 18.0.2 Updater Mac	

APIs, technologies, or features to be deprecated

As FileMaker Pro Advanced evolves, the list of supported technologies, APIs, and features will change. As part of this evolution, certain operating systems versions, hardware, and features may be deprecated in favor of newer ones. Although deprecation does not mean the immediate deletion of an item, you should migrate your solution away from deprecated technologies, because these technologies may be removed in a future version of the product.

For the latest information about deprecated APIs, technologies, and features, search the FileMaker Knowledge Base. For information about new, changed, and removed features, see the most up-to-date version of FileMaker Pro Advanced Help, available on the FileMaker website.
