

## Software Update: FileMaker Pro Advanced 18.0.3

NOTE: See [FileMaker and macOS Catalina Compatibility](#)

This software updates FileMaker® Pro 18 Advanced to version 18.0.3 and fixes bugs. If you are unable to successfully update to FileMaker Pro 18.0.3 Advanced, search the Knowledge Base for installation information.

### Software details

The following issues were addressed.

**Important:** To ensure that you don't encounter the issues below, you must update all clients to FileMaker Pro 18.0.3 Advanced.

### Application

- macOS: FileMaker Pro Advanced was not enabled to ask permission for use of system services.
- macOS: The FileMaker Pro Advanced updater failed if the application name was changed.

### Script steps

- Windows: The Insert from URL script step failed to support the LDAP (Lightweight Directory Access Protocol) protocol.

### Converting files

- During file conversion, a table occurrence was named differently than the table.

### Importing data

- When importing to a new target table and the import order was changed, a field was unavailable for selection.

### Layouts

- Windows: An open drop-down value list overlaid the originating field.
- Windows: The application closed unexpectedly when the view was switched while a popover object was active in the header part.

### Who should download?

Platform	Product	Updates Version	Download 32-bit	Download 64-bit
Windows	FileMaker Pro 18 Advanced	18.0.1 18.0.2	FileMaker Pro 18.0.3 Advanced Updater (setup.exe) <a href="#">Windows</a>	FileMaker Pro 18.0.3 Advanced Updater (setup.exe) <a href="#">Windows</a>
OS X	FileMaker Pro 18 Advanced	18.0.1 18.0.2	FileMaker Pro Advanced 18.0.3 Updater <a href="#">Mac</a>	

**APIs, technologies, or features to be deprecated**

As FileMaker Pro Advanced evolves, the list of supported technologies, APIs, and features will change. As part of this evolution, certain operating systems versions, hardware, and features may be deprecated in favor of newer ones. Although deprecation does not mean the immediate deletion of an item, you should migrate your solution away from deprecated technologies, because these technologies may be removed in a future version of the product.

For the latest information about deprecated APIs, technologies, and features, search the Knowledge Base. For information about new, changed, and removed features, see the most up-to-date version of FileMaker Pro Advanced Help, available on our website.
