

Claris FileMaker Pro 20.1.2 Release Notes

June 2023

This software updates FileMaker Pro 2023 to version 2023 (20.1.2) and addresses issues. If you are unable to successfully update to FileMaker Pro 2023 (20.1.2), search the Knowledge Base for installation information.

Addressed issues

- The Close Window script step in a script triggered by the OnWindowTransaction script trigger failed to close the document window.
- The following French script trigger name and description translations have changed:
 - OnWindowTransaction (English)
 - SurOperationFenetre is updated to SurTransactionFenetre (French)

The following French control script step name and description translations have changed:

- Revert Transaction (English)
 - "Annuler l'opération" is updated to "Annuler la transaction" (French)
- Open Transaction (English)
 - "Ouvrir une opération" is updated to "Ouvrir une transaction" (French)
- Commit Transaction (English)
 - "Valider l'opération" is updated to "Valider la transaction" (French)
- The following French design function name and description translations have changed:
 - BaseTableIDs (English)
 - IDstablesBase is updated to IDstablesBase (French)
 - BaseTableNames (English)
 - NomsTableBase is updated to NomsTablesBase (French)
 - TableIDs (English)
 - IDTable is updated to IDstables (French)
 - LayoutIDs (English)
 - IDModele is updated to IDsmodeles (French)
 - ScriptIDs (English)
 - IDScript is updated to IDscripts (French)
 - FieldIDs (English)
 - IDRubrique is updated to IDsrubriques (French)
 - ValueListIDs (English)
 - IDListeValeurs is updated to IDlistesvaleurs (French)

- The Get (ModifiedFields) function failed to return all field modifications when a field repetition other than the first repetition was modified.
- Creating, modifying, and deleting find requests incorrectly triggered the OnWindowTransaction script trigger.

macOS	FileMaker Pro 2023	20.1.1	FileMaker Pro 20.1.2 Updater 	

APIs, technologies, or features to be deprecated

As FileMaker Pro evolves, the list of supported technologies, APIs, and features will change. As part of this evolution, certain operating systems versions, hardware, and features may be deprecated in favor of newer ones. Although deprecation does not mean the immediate deletion of an item, you should migrate your solution away from deprecated technologies, because these technologies may be removed in a future version of the product.

For the latest information about deprecated APIs, technologies, and features, search the Knowledge Base.
