

Claris FileMaker Pro 20.3.2 Release Notes

February 2024

This software updates FileMaker Pro 2023 to version 2023 (20.3.2) and addresses issues. If you are unable to successfully update to FileMaker Pro 2023 (20.3.2), search the Knowledge Base for installation information.

Addressed issues

- This update provides important security fixes and is recommended for all users.
- macOS Sonoma: Changing modes or reopening files caused custom toolbars to reset to defaults.
- If a file already had a FileMaker or ODBC external data source added, you couldn't add a table from your Claris Studio data source in the relationships graph.

Platform	Product	Updates Version	Download	Languages
Windows	FileMaker Pro 2023	20.3.1	FileMaker Pro 20.3.2 Updater (setup.exe) 	English Czech Polish Turkish Russian
macOS	FileMaker Pro 2023	20.3.1	FileMaker Pro 20.3.2 Updater 	

APIs, technologies, or features to be deprecated

As FileMaker Pro evolves, the list of supported technologies, APIs, and features will change. As part of this evolution, certain operating systems versions, hardware, and features may be deprecated in favor of newer ones. Although deprecation does not mean the immediate deletion of an item, you should migrate your solution away from deprecated technologies, because these technologies may be removed in a future version of the product.

For the latest information about deprecated APIs, technologies, and features, search the Knowledge Base.
