

Clarif FileMaker Server 20.3.2 Release Notes

February 2024

This software updates FileMaker Server 2023 to version 2023 (20.3.2), adds new features and enhancements, and addresses issues.

FileMaker Server 20.3.2 is available as a full installer, which can also upgrade or update an existing installation.

Download the installer from your Electronic Software Download (ESD) page. Or contact our Sales team at: sales@winsoft-international.com

Addressed issues

- This update provides important security fixes and is recommended for all users.
- A reflected cross-site scripting (XSS) attack was made possible due to returned login errors not being HTML encoded.

APIs, technologies, or features to be deprecated

As FileMaker Server evolves, the list of supported technologies, APIs, and features will change. As part of this evolution, certain operating systems versions, hardware, and features may be deprecated in favor of newer ones. Although deprecation does not mean the immediate deletion of an item, you should migrate your solution away from deprecated technologies, because these technologies may be removed in a future version of the product.

For the latest information about deprecated APIs, technologies, and features, search the [Knowledge Base](#).
