Claris FileMaker Pro 21.0.2 Release Notes

September 2024

This software updates FileMaker Pro 2024 to version 2024 (21.0.2) and addresses issues. If you are unable to successfully update to FileMaker Pro 2024 (21.0.2), search the Knowledge Base for installation information.

New features and enhancements

FileMaker WebDirect
- The mobile browser pull-to-refresh option is now disabled by default.

Security
- This release includes general security improvements.

Addressed issues

FileMaker WebDirect
- FileMaker WebDirect slowed significantly after upgrading to FileMaker Server version 21.0.1.
- FileMaker WebDirect intermittently displayed layout freezing, keyboard key repeats, and disappearing text resulting in data loss.

Security
- A reflected cross-site scripting (XSS) attack was made possible due to returned login errors not being HTML encoded.

macOS	FileMaker Pro 2024	21.0.2	FileMaker Pro 21.0.2 Updater Mac	

APIs, technologies, or features to be deprecated

As FileMaker Pro evolves, the list of supported technologies, APIs, and features will change. As part of this evolution, certain operating systems versions, hardware, and features may be deprecated in favor of newer ones. Although deprecation does not mean the immediate deletion of an item, you should migrate your solution away from deprecated technologies, because these technologies may be removed in a future version of the product.

For the latest information about deprecated APIs, technologies, and features, search the Knowledge Base.
