Claris FileMaker Server 20.3.4 Release Notes
April 2025

This software updates FileMaker Server 2023 to version 2023 (20.3.4), adds new features and enhancements, and addresses issues.

FileMaker Server 20.3.4 is available as a full installer, which can also upgrade or update an existing installation.

Download the installer from your Electronic Software Download (ESD) page. Or contact our Sales team at: sales@winsoft-international.com

Addressed issues
FileMaker WebDirect: When text was pasted into a field in the latest versions of Google Chrome or Microsoft Edge, the last character of the pasted text was incorrectly deleted when you clicked somewhere outside of the field.

APIs, technologies, or features to be deprecated
As FileMaker Server evolves, the list of supported technologies, APIs, and features will change. As part of this evolution, certain operating systems versions, hardware, and features may be deprecated in favor of newer ones. Although deprecation does not mean the immediate deletion of an item, you should migrate your solution away from deprecated technologies, because these technologies may be removed in a future version of the product.

For the latest information about deprecated APIs, technologies, and features, search the Knowledge Base.
