

Clarif FileMaker Pro 21.1.2 Release Notes

September 2025

This software updates FileMaker Pro to version 2024 (21.12) and addresses issues. If you are unable to successfully update to FileMaker Pro 2024 (21.1.2), search the Knowledge Base for installation information.

New features and enhancements

Windows: FileMaker Pro now saves product information to a shared location instead of the Windows registry, eliminating the need for administrator privileges and preventing unnecessary User Access Control prompts when starting the application.

APIs, technologies, or features to be deprecated

As FileMaker Pro evolves, the list of supported technologies, APIs, and features will change. As part of this evolution, certain operating systems versions, hardware, and features may be deprecated in favor of newer ones. Although deprecation does not mean the immediate deletion of an item, you should migrate your solution away from deprecated technologies, because these technologies may be removed in a future version of the product.

For the latest information about deprecated APIs, technologies, and features, search the Knowledge Base.
