

Clarif FileMaker Pro 22.0.3 Release Notes

October 2025

This software updates FileMaker Pro to version 2025 (22.0.3) and addresses issues. If you are unable to successfully update to FileMaker Pro 2025 (22.0.3), search the Knowledge Base for installation information.

Addressed issues

Installation and updates

- Windows: FileMaker Pro wouldn't start after updating to version 22.0.2 using Help > Check for Updates.
- Windows: When FileMaker Pro was upgraded to FileMaker Pro 2025 and the previous version was kept, checking for updates in the previous version appeared to upgrade but didn't actually update the version.

Platform	Product	Updates Version	Download	Languages
Windows	FileMaker Pro 2025	22.0.3	FileMaker Pro 22.0.3 Updater (setup.exe) 	English Czech Polish Turkish Russian
macOS	FileMaker Pro 2025	22.0.3	FileMaker Pro 22.0.3 Updater 	

APIs, technologies, or features to be deprecated

As FileMaker Pro evolves, the list of supported technologies, APIs, and features will change. As part of this evolution, certain operating systems versions, hardware, and features may be deprecated in favor of newer ones. Although deprecation does not mean the immediate deletion of an item, you should migrate your solution away from deprecated technologies, because these technologies may be removed in a future version of the product.

For the latest information about deprecated APIs, technologies, and features, search the Knowledge Base.
