

Clarif FileMaker Pro 22.0.5 Release Notes

March 2025

This software updates FileMaker Pro to version 2025 (22.0.5) and addresses issues. If you are unable to successfully update to FileMaker Pro 2025 (22.0.5), search the Knowledge Base for installation information.

New features and enhancements

Windows: You can now speed up starting FileMaker Pro in closed network environments by using the AI_DISABLEEXTERNALURLS property in Assisted Install.txt. Set this property to 1 (one) to prevent FileMaker Pro from accessing external URLs for a faster startup or 0 (zero) to enable access.

When you set this property to 1:

- Features related to Clarif ID, FileMaker Cloud, Clarif Connect, and Clarif Studio will not be available.
- Product announcements in the Home window and notifications for software updates and new versions will be disabled.
- License certificates must be updated manually.

See [FileMaker Pro Network Install Setup Guide](#).

Addressed issues

- Text using the Courier New font displayed incorrect character spacing and kerning when saving records as PDF files.
- The Home window was unresponsive for 5 to 15 seconds when starting FileMaker Pro.

APIs, technologies, or features to be deprecated

As FileMaker Pro evolves, the list of supported technologies, APIs, and features will change. As part of this evolution, certain operating systems versions, hardware, and features may be deprecated in favor of newer ones. Although deprecation does not mean the immediate deletion of an item, you should migrate your solution away from deprecated technologies, because these technologies may be removed in a future version of the product.

For the latest information about deprecated APIs, technologies, and features, search the Knowledge Base.
